

OFFICE OF RAIL REGULATION

Taking Forward the Occupational Health Agenda....

- **What would you like to see included in the ORR's Occupational Health Programme 2014-2019 ?**
- **What products would you like to see developed during the programme ?**
- **How can we make improvements from the 2010-14 Programme ?**
- **What activities would you like to see more of ?**
- **How can we achieve this ?**
- **What would help “engagement” with Managers' & Supervisors' ?**

Please send your ideas to: Claire Dickinson

In 2010 our vision was:

To promote and deliver our vision of a rail industry that consistently achieves best practice in occupational health

What should be the vision of the 2014-19 programme ?

In 2010 we aimed to:

- **Provide leadership on health regulation**
- **Deliver activities to encourage industry players towards our vision**
- **Provide links to sources of information and advice, particularly any legal duties and how organisations should comply with them**
- **Encourage a culture that proactively responds to health issues**

so that we can secure compliance by the rail industry with its regulatory obligations and help it achieve best practice in occupational health.

What should be the aim of the 2014-19 programme ?
