8 September 2016

Company Secretary
Network Rail Infrastructure Limited
1 Eversholt Street
London
NW1 2DN

Network licence condition 7 (land disposal): Bradford Forster Square station, West Yorkshire

Decision
1. On 14 July 2016, Network Rail gave notice of its intention to dispose of land at Bradford Forster Square station, West Yorkshire (the land), in accordance with paragraph 7.2 of condition 7 of its network licence. The land is described in more detail in the notice (copy attached).

2. We have considered the information supplied by Network Rail including the responses received from third parties you have consulted. For the purposes of condition 7 of Network Rail’s network licence, ORR consents to the disposal of the land in accordance with the particulars set out in its notice.

Reasons for decision
3. We note Network Rail has consulted all relevant stakeholders with current information and no other reasonably foreseeable railway use for the land was identified.

4. In considering the proposed disposal we also note that:
   • there is no evidence that railway operations at Bradford Forster Square station would be affected adversely;
   • the easement will facilitate an increase in station car parking of 12 spaces and form part of a larger improvement/regenerative plan around the Bradford ‘gateway’. The regenerative scheme will also provide further car parking capacity in the vicinity; and
   • Network Rail has yet to complete the station change procedure¹ but it must do so prior to disposing of the land.

¹ The station change procedure will deal with matters related to the layout of the station facilities and requires the station facility owner and train operators using the station to be consulted on any proposed changes.
5. We also note Network Rail’s subsequent statement that it will liaise with Northern, the station facility owner and West Yorkshire Combined Authority to ensure that the number of disabled car parking spaces provided complies with the relevant legislation for disabled users.

6. Based on all the evidence we have received and taking into account all the material facts and views relevant to our consideration under condition 7, we are satisfied that there are no further issues for us to address.

7. We have had regard to our decision criteria in *Land disposal by Network Rail: the regulatory arrangements, December 2013,* and balanced our section 4 duties given to us under the Railways Act 1993. In doing so we have given particular weight to our duty to exercise our functions in a manner which we consider best calculated to “protect the interests of users of railway services”.

8. We have therefore concluded that the proposed disposal is not against the interests of users of railway services and that our consent should be granted.

Les Waters
Duly authorised by the Office of Rail and Road

<tr>
<td>Anticipated Rail benefits</td>
<td>Increased number of car park spaces Part of a package of works enhancing the environment around Forster Sq. station</td>
</tr>
<tr>
<td>Anticipated Non-rail benefits</td>
<td>Part of a project regenerating an adjoining former Royal Mail building.</td>
</tr>
</tbody>
</table>

### 3. Timescales

**Comments on timescales**
The disposal will complete assuming consent is granted.

### 4. Railway Related Issues

**History of railway related use**
The land was originally part of the Bradford Forster Sq. goods yard. It passed out of railway ownership to the National Freight Corporation in 1976. A development scheme in the late 1990s resulted in the development of the existing station car park and station.

**When last used for railway related purposes**
Land has been in use as part of the station car park since c1998.

**Any railway proposals affecting the site since that last relative use**
There is a Masterplan scheme being promoted for Forster Square station by West Yorkshire Combined Authority (WYCA) and Bradford Council. The aim is to enhance the appearance of the station as a Gateway to the city and reap economic regeneration benefits from this. The proposed scheme is part of this overall plan.

**Impact on current railway**
Scheme is part of current rail related proposals to enhance
<table>
<thead>
<tr>
<th>related proposals</th>
<th>Forster Sq. station.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential for future railway related use</td>
<td>The site will remain in railway related use. The car park spaces displaced by the proposed footpath are being replaced.</td>
</tr>
<tr>
<td>Any closure or station change or network change related issues</td>
<td>The works and changes to the car park will be covered by a Station Change proposal. The works will only commence once this is in place and approved.</td>
</tr>
<tr>
<td>Whether disposal affects any railway (including train operator) related access needs, and how these are to be addressed in future</td>
<td>No</td>
</tr>
<tr>
<td>Position as regards safety / operational issues on severance of land from railway</td>
<td>The disposal does not include any requirement for new fencing of the boundary, because its location or the nature of the disposal is such that the boundary demarcation is not needed. The disposal is on a basis under which Network Rail has had due regard (where applicable) to impact of the disposal on lineside works, including railway troughing, signalling and their maintenance. The disposal is without prejudice to Network Rail’s safety obligations, with which Network Rail will continue to comply. Network Rail’s network licence requires compliance with Railway Group Standards. These set out requirements for – amongst other things – fencing, access and signal sightings. In addition, the Railways and Other Guided Transport Systems (Safety) Regulations 2006 require Network Rail to have a safety management system and safety authorisation in respect of its mainline railway system and its railway infrastructure. These, in turn, require Network Rail to comply with Railway Group Standards as well as its own internal standards; and also continually to monitor changes to the risks arising from its operations and to introduce new control measures as appropriate.</td>

Annex 1 – Network Rail’s Consultation request

Property: Bradford Forster Square - easement for footpath across station car park

We seek to consult you as regards your views, please, on our proposed disposal by way of grant of an easement.

We attach a draft application form to the Office of Rail Regulation which, with its related plan(s), explains the proposal in detail. Subject to the outcome of our consultation, we may make a formal application to ORR for consent to make the disposal under the terms of our network licence land disposal condition. We would expect to make an application based on this form, updated in the light of consultation responses.

Alternatively, if in the light of the consultation responses, the proposed disposal would qualify to be made under ORR’s general consent, we may complete it accordingly.

ORR reviewed our land disposal arrangements so that from 1 April 2008, ORR will no longer launch any separate consultations when we apply for consent to dispose of land. The arrangements are that we will consult and report the results to ORR in conjunction with our application. It is therefore important that we have your views, so that these may be considered in ORR’s decision.

We request your comments, please, by 16th May 2016 (including any “no comment” response). It would be helpful if your response is provided by email.

If you have any queries as regards this proposal, please direct them to xxxx or Email – @networkrail.co.uk. If future consultations of this nature should be directed differently to your organisation, please advise us of the appropriate contact details, so we may amend our records.

Yours faithfully,

Hi

Thank you for sending through the consultation details for proposed land disposal at Bradford Forster Square - easement for footpath across the station car park.

I write to confirm that WYCA is supportive of this proposal. We are happy that the changes being proposed for the car park are in line with recent discussions and plans developed as part of the wider West Yorkshire Plus Transport Fund station redevelopment scheme. We are pleased to see that the displacement of some car parking spaces from the area of the proposed footpath location are being accommodated within a slightly increased car park footprint.

Best wishes

Hello

ACoRP have no objection to this disposal.

Regards

ACoRP

Sent from my iPhone
Having looked at the attached proposal I have the following comments to make.

BTP has no objection to the proposed footpath. Whilst it is not ideal to have a public right of way through a station car park it appears that the plans submitted have left enough space for the path to run between the parking bays without users getting too close to the parked vehicles. There is already a significant amount of pedestrian flow through this space so regulating it would probably be beneficial.

If there are any changes to the width or nature of the route before work begins please let us know.

26 Transport Focus (Formerly Passenger Focus)

Thank you for sending Transport Focus details of the proposed land disposal in Bradford. They note that:

- the disposal will be an easement across part of the station car park;
- it will be used for pedestrian access to a new development, for which a planning application has been made;
- it will be granted to xxxx
- a "masterplan" for the station area is being developed by the local councils, and the car park will be enlarged, with 82 spaces, an increase of 12;
- a Station Change will be issued for those works.

Passengers will benefit from the improvements to the station's surroundings; Transport Focus has no objection to the proposed disposal.

Subject: FW: URGENT - FW: Consultation on proposed land disposal: Bradford Forster Square - easement for footpath across station car park

The below says most of what we would wish to comment with but I would add that we would therefore wish that NwR stipulate that the easement is solely reserved for pedestrian movements only and that it is protected from any future attempts to be used for motor vehicular movements.

Let me know if you need anything further

Thanks,

I’ve no objection per se, but would re-iterate the earlier point that this walkway effectively brings pedestrians across to a vehicular entrance to the Forster Square retail park. Presumably Network Rail are aware of this, in its discussion with British Land?
Can I confirm with you as to whether CBMDC would have any objection to this? Its something in terms of the alignment that those of use working on the station Masterplan are happy to accept. Would this also be your position?

They are expecting feedback today / latest of lunchtime tomorrow.

I'm out of the office shortly but back in 1630ish and all tomorrow am to discuss if need be.

Tom
